25

What is claimed is:

- 1. A method for modulating metabolism of ciprofloxacin-resistant and/or *Streptococcus pneumoniae* comprising the step of contacting ciprofloxacin-resistant *Streptococcus pneumoniae* with an antibacterially effective amount of a composition comprising a gemifloxacin compound, or antibacterially effective derivatives thereof.
- 2. The method of claim 1 wherein said ciprofloxacin-resistant *Streptococcus* pneumoniae is ciprofloxacin-resistant *Streptococcus* pneumoniae having an MIC ≥ 8 µg/ml of ciprofloxacin.
- 10 . A method of treating or preventing a bacterial infection by ciprofloxacinresistant Streptococcus pneumoniae comprising the step of administering an antibacterially
 effective amount of a composition comprising a gemifloxacin compound to a mammal
 suspected of having or being at risk of having an infection with ciprofloxacin-resistant
 Streptococcus pneumoniae.
- The method of claim 3 wherein said ciprofloxacin-resistant Streptococcus pneumoniae is ciprofloxacin-resistant Streptococcus pneumoniae having an MIC ≥8 μg/ml of ciprofloxacin.
 - 5. The method of claim 1 wherein said modulating metabolism is inhibiting growth of said bacteria.
- 20 6. The method of claim 1 wherein said modulating metabolism is killing said bacteria.
 - 7. The method of claim 1 wherein said contacting said bacteria comprises the further step of introducing said composition into a mammal.
 - 8. The method of claim 3 wherein said mammal is a human.
 - 9. The method of claim 7 wherein said mammal is a human.
 - 10. The method of claim 8 wherein said bacteria is selected from the group consisting of: ciprofloxacin-susceptible pneumococci having an MIC $\leq 4 \mu g/ml$ of ciprofloxacin;
 - ciprofloxacin-resistant pneumococci having an MIC ≥8 µg/ml of ciprofloxacin;
- 30 ciprofloxacin-susceptible *Streptococcus pneumoniae* having an MIC ≤4 μg/ml of ciprofloxacin; and
 - ciprofloxacin-resistant Streptococcus pneumoniae having an MIC $\geq 8 \,\mu g/ml$ of ciprofloxacin.
 - 11. The method of claim 9 wherein said bacteria is selected from the group

10

30

consisting of: ciprofloxacin-susceptible pneumococci having an MIC \leq 4 $\mu g/ml$ of ciprofloxacin;

ciprofloxacin-resistant pneumococci having an MIC $\geq 8 \,\mu g/ml$ of ciprofloxacin; ciprofloxacin-susceptible *Streptococcus pneumoniae* having an MIC $\leq 4 \,\mu g/ml$ of ciprofloxacin; and

ciprofloxacin-resistant Streptococcus pneumoniae having an MIC $\geq 8 \mu g/ml$ of ciprofloxacin.

- 12. A method for modulating metabolism of ciprofloxacin-sensitive *Streptococcus* pneumoniae comprising the step of contacting ciprofloxacin-sensitive *Streptococcus* pneumoniae with an antibacterially effective amount of a composition comprising a gemifloxacin compound, or antibacterially effective derivatives thereof.
- 13. The method of claim 12 wherein said ciprofloxacin-sensitive *Streptococcus* pneumoniae is a ciprofloxacin-susceptible pneumococci having an MIC $\leq 4\mu g/ml$ of ciprofloxacin.
- 14. A method of treating or preventing a bacterial infection by ciprofloxacinsensitive *Streptococcus pneumoniae* comprising the step of administering an antibacterially
 effective amount of a composition comprising a gemifloxacin compound to a mammal
 suspected of having or being at risk of having an infection with ciprofloxacin-sensitive

 Streptococcus pneumoniae.
- 15. The method of claim 14 wherein said ciprofloxacin-sensitive Streptococcus pneumoniae is ciprofloxacin-susceptible Streptococcus pneumoniae having an MIC ≤4μg/ml of ciprofloxacin.
 - 16. The method of claim 12 wherein said modulating metabolism is inhibiting growth of said bacterial.
- 25 17. The method of claim 12 wherein said modulating metabolism is killing said bacterial.
 - 18. The method of claim 12 wherein said contacting said bacterial comprises the further step of introducing said composition into a mammal.
 - 19. The method of claim 14 wherein said mammal is a human.
 - 20. The method of claim 18 wherein said mammal is a human.
 - 21. The method according to Claim 1, 3, 12, or 14 wherein the gemifloxacin compound is gemifloxacin or a pharmaceutically acceptable salt thereof.
 - ·22. The method according to claim 21 wherein the gemifloxacin compound is gemifloxacin mesylate or a hydrate thereof.

23. The method according to claim 22 wherein the gemifloxacin compound is gemifloxacin mesylate sesquihydrate.
